ANANYA

endless decor ideas

A Unit of BANSAL WOODDECOR PVT. LTD.

ANANYA, a front-runner onestop interior and exterior products mall have it's origin in the year1995.

A humble start-up by Mr. Vikas Bansal by the name of **"M/s Bansal Wood Decor (P) Ltd."**, focusing on a single point i.e. plywood, laminates, doors, veneers and other interior & exterior products. It's been almost two and half decade in the journey of providing the best of the products in the best of the class under one roof.

ANANYA have one of the largest portfolio of products from India and abroad as well to offer to architects, interior designers, builders, educational institutes, private & government enterprises and all other walk-ins. As essential resource we can provide sound and knowledgeable advice for all sizes of commercial, residential and public places along with leisure related projects like clubs, farm houses, hotels, restaurants, spas and gardens etc.

Our Mission

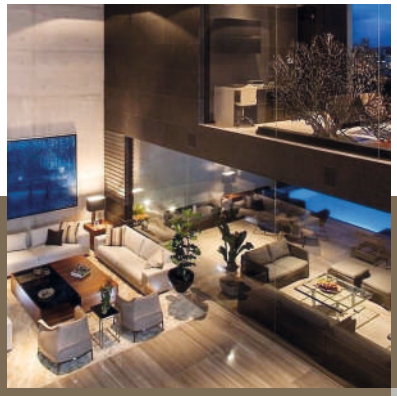

We aim to lead the interior infrastructure industry through quality products, excellent service, and customer satisfaction. Our focus is on sustainable growth with minimal environmental impact, driven by continuous innovation to meet evolving customer needs.

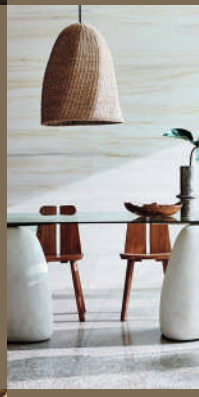

Our Vision

To revolutionize the interior infrastructure industry by providing innovative, sustainable, and high-quality products that enhance the functionality, aesthetics, and well-being of built environments, while fostering long-term relationships with customers, partners, and stakeholders.

Your space. Reimagined for tomorrow.

PRODUCTS

Decorative Laminate

Decorative laminates are layered materials used to enhance surface aesthetics. They are made by bonding layers of paper, resin, and other materials under heat and pressure.

Applications

Furniture making | Interior design
Building construction | Signage and displays

Benefits

Durability | Easy Maintenance
Design | Cost-Effective

Types of Decorative Laminates

- High Pressure Laminates (HPL)
- Low Pressure Laminates (LPL)
- Compact Laminates
- Decorative Paper Laminates
- Thermosetting Laminates
- Acrylic Laminates
- PVC Laminates

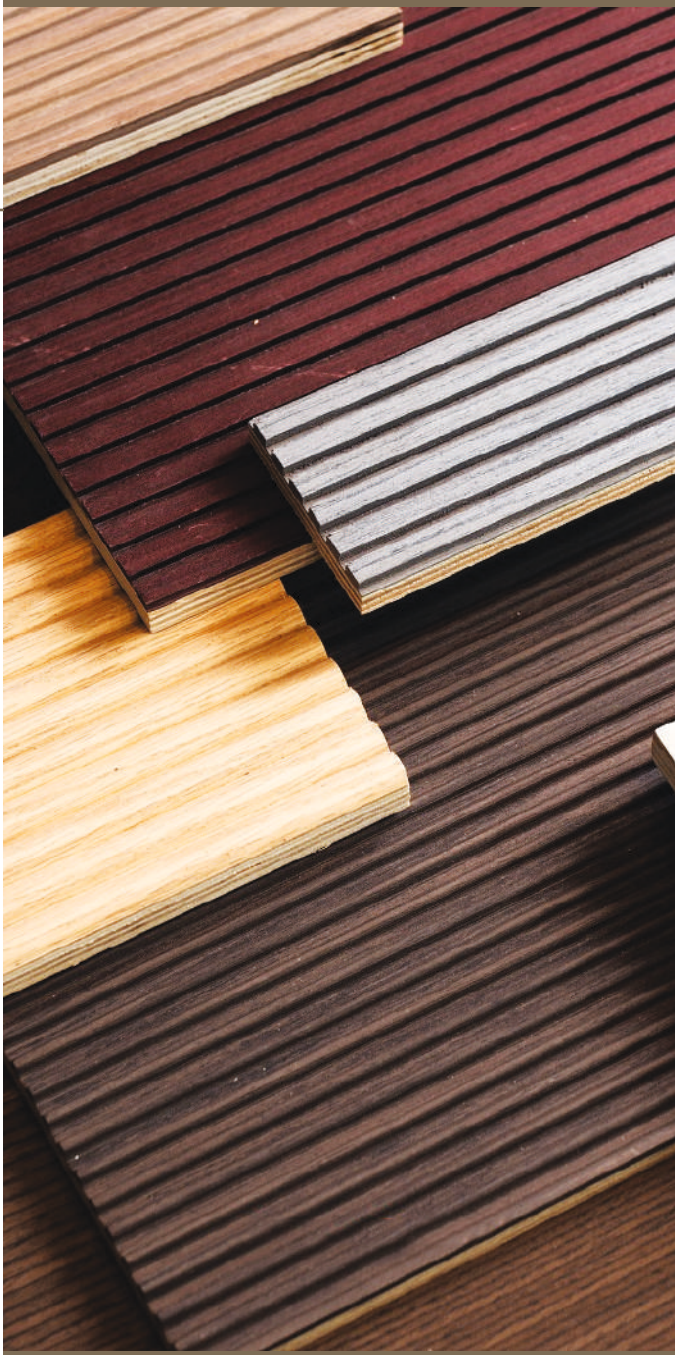

PRODUCTS

Veneers

Veneer is a durable and versatile material that can be used in numerous ways to cover or enhance the appearance of surfaces such as furniture, cabinetry, and walls. While it is largely made from real wood, you will also find engineered veneers that deliver design consistency over large spaces. Wood veneers are a great way to add a touch of elegance and sophistication to your home interiors.

- Natural Veneers
- Recon Veneers
- Smoked Veneers
- Dyed Veneers
- Textured Veneers

PRODUCTS

WPC Boards, Doors & Frames

WPC stands for Wood Plastic Composite. WPC doors and frames are made from a combination of wood fibers and plastic materials, offering several benefits, including:

Advantages of WPC Doors and Frames:
Durability | Moisture Resistance
Low Maintenance | Sustainable
Termite and Borer Proof | Fire Retardant

Characteristics:
Composite Material | Waterproof | Stable

Applications:
Interior and Exterior Doors | Door Frames

WPC doors and frames offer a durable, sustainable, and low-maintenance alternative to traditional wood products.

PRODUCTS

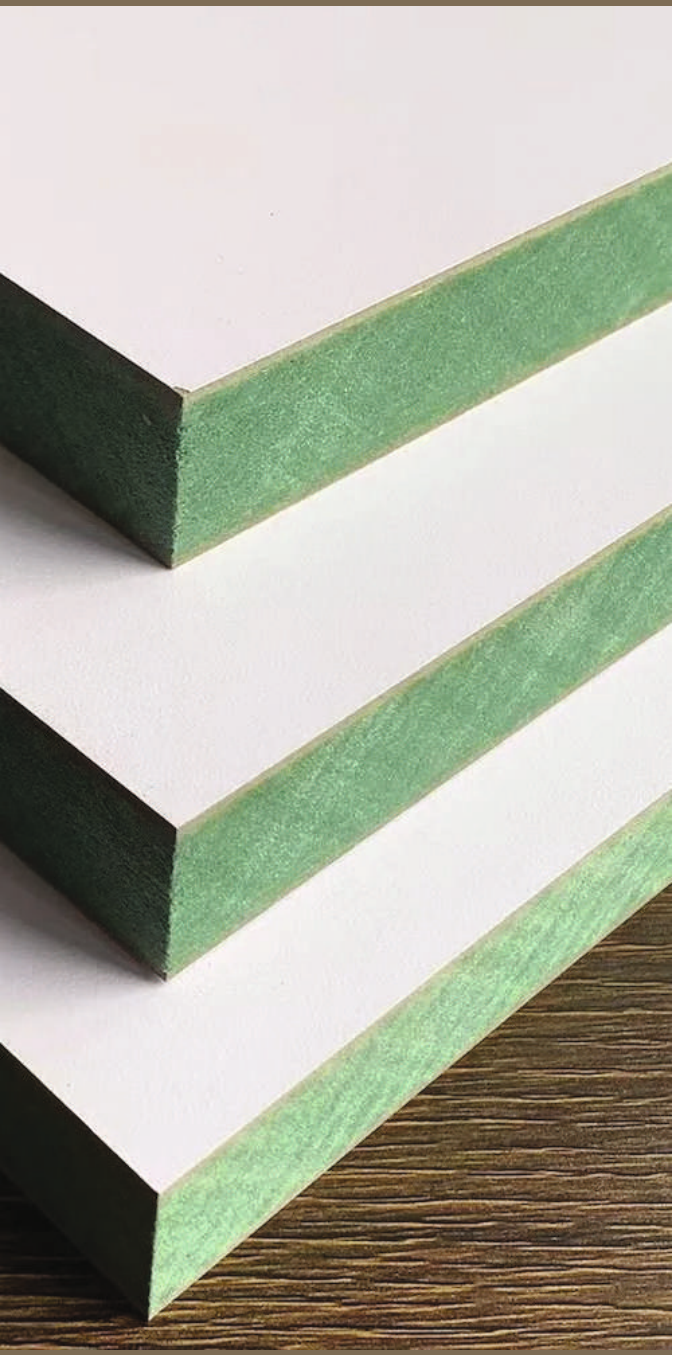

MDF/ HDHMR/ Boilo

Prelaminated MDF: A type of medium-density fiberboard (MDF) with a pre-laminated surface.
Features: Smooth surface, resistant to scratches and fading, available in various designs and colors.
Advantages: Cost-effective, easy to install, and suitable for interior applications.

Particle Boards: A type of engineered wood made from wood particles, such as sawdust or wood chips, bonded together with adhesives.
Features: Cost-effective, lightweight, and easy to work with.
Advantages: Affordable, suitable for furniture making, and can be used for interior applications.

HDHMR (High-Density High-Molecular-Weight Resin): A type of engineered wood made from wood fibers bonded together with high-density, high-molecular-weight resin.
Features: High density, moisture-resistant, and durable.
Advantages: Suitable for high-humidity areas, resistant to warping and cracking, and ideal for applications requiring durability.

PRODUCTS

Louvers

Charcoal Louvers - Made from charcoal-infused materials, beneficial for acoustics and air quality. It purifies air, reduces odors, and offers unique aesthetics.

Wooden Louvers - Crafted from natural wood, providing warmth and a natural look. It adds character to interiors, durable, and can be stained or painted.

PVC Louvers - Made from PVC, durable, water-resistant, and easy to maintain. It is Suitable for high-humidity areas, resistant to warping and cracking.

Applications

Windows & Doors | Room Dividers
Decorative Elements

Benefits

Airflow Control | Light Control | Aesthetic Appeal

PRODUCTS

Doors

Factory made, ready to fit Door Solutions is an emerging category, which offers large potential for both residential and commercial construction. Compared to current practice of mainly site fabrication and door frame fixing during wet construction - 'solutions' approach involves manufacturing of door frames and door panels as a matched pair in factory and fixing at the point of use.
